INFOGRAPHICS

BEFORE READING

No contexto da pandemia, muitas notícias são veiculadas com o uso de recursos de imagens. Uma parte das informações, com dados relevantes, é apresentada em forma de infográfico. No MCE dessa semana iremos compreender um pouco mais sobre essa estrutura de comunicação visual.

1. Read the texts and the images below.

What are infographics?

Infographics are **visual representations** of information, data, or knowledge meant to present complex information quickly and clearly. Infographics use many different strategies to present information, including **graphs, charts, maps, diagrams, and pictures** (and often a mixture of several of these).
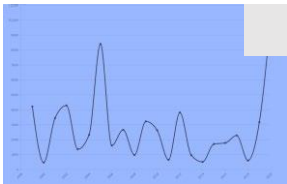

Source: https://www.calacademy.org/educators/infographics-in-the-classroom-teacher-toolkit

Why to use infographics?

•Analyzing and Interpreting Data
•Mathematical and Computational Thinking
•Constructing Explanations and Designing Solutions
•Engaging in Argument from Evidence
•Obtaining, Evaluating, and Communicating Information

A. Match the words to the images.

(1) Graphs – (2) Charts – (3) Maps – (4) Diagrams - (5) Pictures - (6) Infographic

Tools to Create Infographics

An **infographic** is a powerful tool that can help explain something. Infographics present information visually and in an entertaining way. This can help watchers, listeners and readers understand the subject of interest.

You can use infographics on social media, in presentations or just for fun. BitRebels.com says the human brain absorbs ideas presented in infographics three times faster than ideas presented in simple **text**.

The easiest way to create infographics is to start with a **template** you can fill with facts. With most infographic templates, you can add images, **icons** and also backgrounds.

Infographic websites offer free templates and tools to help you create. Just pick the template you want, then drag and drop **items** onto the infographic.

Many of these sites let you add your own images from a computer. Type in text, choose **fonts** and colors, then save your infographic and/or share it on social media.

These sites make creating infographics easy and free: Piktochart, Canva,Venngage,Visme, Easelly.
